

## Build a foundation for visualizing data (GIS, infographics, digital and other media products)

Project Title	Build a foundation for visualizing data (GIS, infographics, digital and other media products)
Project Summary	USAID/Nicaragua is improving the way it tells its story. We are establishing a database for the Geographical Information System (GIS), creating infographics with data from our own and external studies, and also adapting various materials for digital and social media platforms.
Country	Nicaragua
Agency	Agency for International Development
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	2

## Project Description

You will work with USAID/Nicaragua on a variety of activities under its new outreach and communication strategy to tell more compelling stories about its programs. USAID is helping Nicaraguans to better advocate for their needs, empowering them to organize community projects, and supporting the programs that work with at-risk-youth and marginalized children to access better traditional and vocational education. We want our successes to be effectively told to a variety of audience in Nicaragua, the United States, and around the world. Therefore, we are seeking motivated and talented students who could help us establish a database for the Geographical Information System (GIS), create infographics with data from our own and external studies, and also adapt various materials for digital and social media platforms. You may have an opportunity to take part in the outreach and communication strategy meetings to share insights, pitch new product ideas, design a campaign, and lead a project.

## Desired Skills Interests

# Additional Information

You will be part of a 9-member Program Office team, which oversees strategy and project development, budget, outreach and communication, and monitoring and evaluation.
